### **ABOUT ME**

I've always been into development due to the software professionals around me. With a background in design and deep expertise in the JavaScript ecosystem, I specialize in creating intuitive, beautiful front-end experiences. I especially like working with tight-knit teams where I can tackle fresh challenges and make real impact.

### **WORK EXPERIENCE**

- 1. Software Engineer (Nexobe | Remote)** Sep 2024 - Present  
Contributing to the development of SaaS tools at Nexobe using Next.js, TypeScript, and Tailwind CSS. Focused on building scalable, efficient applications that deliver seamless user experiences across our AI product suite. In connection with design team for UI decisions.
- 2. Software Engineer (Gridship | Remote)** Dec 2023 - Oct 2024 · 11 mos  
Built scalable features for Treply's SMS marketing SaaS platform, covering campaigns, surveys, automations etc. Collaborated across teams to deliver a seamless, engaging user experience. Helped the company with some design decisions.
- 3. Web Developer (Freelance | Remote)** Apr 2023 - Dec 2023 · 9 mos  
As a designer, I specialized in creating impactful shirt designs, memorable logos, and clean, user-friendly web interfaces. My work combined creativity with strategic design to help clients build recognizable brands and visually engaging online experiences.

### **SKILLS**

- 1. Languages:** JavaScript - TypeScript - Python
- 2. Libraries & Frame Works:** React JS - Next JS - Node JS - Express JS
- 3. Storage:** Mongo DB - Firebase - Supabase - SQL - Postgres
- 4. Styling:** Tailwind CSS - Bootstrap - Chakra UI - Daisy UI

### **PROJECTS**

- 1. [Otteri](#)** - An all-in-one AI solution platform with every AI model in one place, from images to video and text you are all covered with just one subscription.

2. [Caviti](#) - Dental supply chain management and automation tool which tracks your inventory usage and keeps it up to date with usage trends and integrations.
3. [Cloud Box](#) - A web application providing secure, real-time cloud storage solutions with Supabase and Firebase with seamless data sync for an optimized user experience.
4. [Pen My Work](#) - A text to handwritten notes generator with various paper types with customizable writing styles and ink colors to hand write anything effortlessly.

## **EDUCATION**

Bachelor's in computer sciences from Muhammad Ali Jinnah University, Karachi, Pakistan
